Samsung Phone Settings

First, go to the **email app**, click the **three dots** in the top right hand corner of the screen (opens a menu). Click **Settings**, then **Manage accounts**. If this is a new account, click the + at the top of the screen, add the settings listed below.

If you are correcting the settings of an already created account, click the account you want to adjust the settings in. Scroll down to the bottom, and click **More Settings**, at the bottom click the server settings that you need to modify and add the settings below.

Incoming settings
